Hernán Hawryluk

CTO & AI-Native Full-Stack Engineer

Monte Grande, Buenos Aires, Argentina | +54 9 11 3047-1861 | hernanhawryluk@gmail.com
Portfolio | LinkedIn | GitHub

Professional Profile

CTO and Full-Stack Developer specializing in Java and Spring Boot backend development and application security. I lead digital products from requirements and architecture through implementation and production operations, combining web and mobile development with AWS infrastructure and CI/CD pipelines.

I work with clients and teams to define priorities and make technical decisions. I integrate spec-driven development (SDD) and AI agents into my workflow, using project context, acceptance criteria, code reviews, and automated tests.

Professional Experience

Hako Software

CTO & Full-Stack Developer | September 2024 - Present

- Lead product architecture and evolution, defining requirements, priorities, and roadmaps with clients and stakeholders.
- Design and develop backend services, APIs, and web and mobile applications, with a focus on security and maintainability.
- Manage AWS infrastructure, CI/CD pipelines, observability, deployments, and releases to the App Store and Google Play.
- Apply SDD and coordinate AI agents for analysis, implementation, testing, and documentation; review changes and validate deliverables against acceptance criteria.

Bytewave

Full-Stack Developer | February 2024 - August 2024

- Developed and maintained backend services and REST APIs with Java and Spring Boot for applications with thousands of active users.
- Contributed to React web interfaces and React Native mobile applications, and worked with clients to define requirements.
- Managed AWS infrastructure, CI/CD pipelines, GitHub repositories, and releases to the App Store and Google Play.

Freelance

Full-Stack Developer | October 2022 - March 2024

- Developed complete commercial products, including backend services, web and mobile applications, AWS infrastructure, and automated deployments.
- Managed application releases and maintenance on the App Store and Google Play.
- Contributed to projects that exceeded 10,000 active users.

Selected Projects

Projects developed before I incorporated AI agents into my workflow, with direct involvement in design, implementation, and production deployment.

Metropistas | Roadside assistance in Puerto Rico with geolocation, coverage validation, and push notifications. Spring Boot backend and native applications built with SwiftUI and Kotlin.

iCatalogIQ | Automated auditing application that detects errors and inconsistencies in music catalogs. FastAPI, React, and AWS.

ByUClub | Management and promotion of benefits and discounts integrated into a digital wallet. Spring Boot, React, and AWS.

TiendaRep | E-commerce with product management, search, a shopping cart, and Mercado Pago payments. React Native, TypeScript, and Expo.

OUT Bares y Experiencias | Application for discovering bars, making reservations, and purchasing experiences in Buenos Aires. React Native, TypeScript, and Expo.

Technical Skills

Backend: Java, Spring Boot, Python, FastAPI, Node.js, NestJS, Django, REST APIs, microservices, and external integrations.

Security and Quality: OWASP, JWT, OAuth2, access control, data protection, rate limiting, and automated testing.

Data and Performance: SQL, MySQL, PostgreSQL, MongoDB, Firebase, Redis, caching, WebSockets, and query optimization.

Web: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, and Bootstrap.

Mobile: React Native, Expo, Swift, SwiftUI, Kotlin, Jetpack Compose, Expo EAS, and releases to the App Store and Google Play.

Cloud and DevOps: AWS, Docker, Bash, CI/CD, Git, GitHub, environment management, and observability.

AI-Assisted Engineering: SDD, agent orchestration, context management, specifications, acceptance criteria, and code validation.

Leadership and Product: Requirements gathering, roadmap planning, prioritization, team leadership, and Agile and Scrum methodologies.

Education and Certifications

Technical Specializations on Coursera | December 2023 - February 2024

Training in backend, frontend, mobile development, and Agile methodologies, with certifications from Meta, Google, and IBM. Courses taught in English.

Programming and Software Development Fundamentals on Platzi | March 2021 - March 2022

Training in programming logic, object-oriented programming, and cybersecurity fundamentals.

Languages

Spanish: Native.

English: Intermediate, with advanced comprehension and intermediate conversational proficiency.
